**REPRINTS:** Official imitations of all values were made in 1885 in Hamburg. Imitations are of the network down variety and since new plates were made for the text, the easiest way to distinguish imitations is as follows: Draw an imaginary line from the upper left corner of the rectangular border to the lower right corner. The line should pass through the lower part of the 'P', while on reprints it will pass just below the center of the 'P'.
