

Austro Hungarian Occupation of BOSNIA & HERZEGOVINA 1878 - 1908

1879 - 1894

Coat of Arms Design

perf 9 to 13½ , watermark 91, litho (type I)

Type I — The heraldic eaglets on the right side of the escutcheon are entirely blank. The eye of the lion is indicated by a very small dot, which sometimes fails to print.

Type II — There is a colored line across the lowest eaglet. A similar line sometimes appears on the middle eaglet. The eye of the lion is formed by a large dot which touches the outline of the head above it

Type III — The eaglets and eye of the lion are similar to type I. Each tail feather of the large eagle has two lines of shading and the lowest feather does not touch the curved line below it. In types I and II there are several shading lines in these feathers, and the lowest feather touches the curved line.
